INTRODUCTION

While designing the curriculum of specialized subjects such as Cyber Security, Digital Forensics, IoT, Cloud Computing and so forth, due to the time constraints of the semester pattern system and scarcity of resources, generally, the education institutes are unable to incorporate various advanced features such as research focus, industrial orientation, hands on training experience, and imparting advanced knowledge. Our objective is to fulfil these knowledge gaps with the help of internationally renowned Foreign Faculty of World Class Universities, Professors of Premier Institutes of India (IIT or IISc Bangalore), IT industry experts, “IoTCloud Research Group” of IIIT-Kottayam along with “IoTCloud Research Lab” of IIIT-Kottayam, Kerala.
